

SUNGENE INDUSTRIAL IOT

Remote Monitoring & Data Acquisition

Remote monitoring solutions for water, energy
and industrial equipment

LoRaWAN . NB-IoT . RS485 . Modbus . 4G LTE

Product Catalog 2026 - Edition v1

Remote monitoring, by scenario

Water Monitoring

Tank level monitoring, water leak detection and pump monitoring for water utilities, industrial facilities and agriculture - using LoRa / NB-IoT wireless sensors and gateways.

Energy Monitoring

Smart metering, energy data collection and solar site monitoring to spot loss, downtime and underperformance in time, across energy, solar and telecom sites.

Equipment Monitoring

Temperature monitoring, RS485 / Modbus data acquisition and alarm notification for remote equipment and industrial assets - pushed to operators, not discovered on the next site visit.

Where customers start their search

Tank Level Monitoring

Continuous remote level readings for tanks and reservoirs.

Pump Monitoring

Run status, faults and alarms for remote pumps.

Solar Site Monitoring

Production and asset data from distributed solar sites.

Remote Meter Reading

Automated meter reads over RS485 / wireless.

Equipment Alarm Notification

Temperature and status alarms pushed in real time.

Fan-Coil Thermostat - RS485 / LoRa

Power	AC 220V
Communication	RS485 (Modbus) / LoRa
Display	Room temp + setpoint, LCD
Fan control	3-speed
Scheduling	Weekly programming
Control	Local + central / remote
Mounting	Wall-mount (86 box)

Request a quote: contact@sungenelite.com

Variable-Speed Fan-Coil Controller - 0-10V

Power	AC 220V
Fan output	0-10V (EC / DC brushless)
Communication	RS485 / LoRa
Display	Room temp + setpoint, LCD
Fan control	3-speed / variable
Scheduling	Weekly programming
Control	Local + central / remote

Request a quote: contact@sungenelite.com

WiFi Floor-Heating & Boiler Thermostat

Power	AC 220V
Communication	WiFi 2.4GHz (no gateway)
Application	Floor heating / boiler
Display	Room temp + setpoint, LCD
Scheduling	Daily + weekly
Control	Local + app
Mounting	Wall-mount (86 box)

Build your Industrial IoT business with SunGene

Distributor Program

Resell SunGene gateways, sensors and controllers in your region with distributor pricing and stock support.

System Integrator Program

Specify and integrate our devices into your monitoring projects with technical and documentation support.

OEM / Private Label Program

Put your brand on proven hardware with flexible MOQ and ODM/OEM customization.

Why partner with SunGene

Taiwan-based service . China manufacturing network . Fast OEM support . Low MOQ . English communication . Export experience
